SKILLS:

C#, Java, JavaScript, SQL, Postgres, Node.js, MongoDB

Object oriented Programming, Git and GitHub, DBMS, Linux

EXPERIENCE:

Junior Software Engineer
Syncfusion | March 2024 – July 2024

- Developed CRUD applications using C# for backend functionality and JavaScript for dynamic front-end interfaces.

- Designed, optimized, and managed databases with Postgres to ensure efficient data handling and retrieval.

- Collaborated with cross-functional teams during training to deliver scalable and user-friendly applications.

- Enhanced knowledge of full-stack development, focusing on performance optimization, code quality, and debugging techniques.

PROJECTS:

Library Management - *Developed during internship at Syncfusion*

- Created a web application using HTML, CSS, and JavaScript for the frontend, with C# as the backend and Postgres for database management.

- Implemented all CRUD operations, enabling user account creation, wallet balance management, and product purchases.

- Admin users can add, delete, and modify product listings.

Hand Cricket Game

- Developed a web-based game using HTML, CSS, and JavaScript based on hand cricket mechanics.

- Users select a number from 1 to 6, and the game ends if their selection matches the computer's choice; otherwise, the score is updated.

- Hosted the game on GitHub Pages.

Personal Portfolio Website:

- Created a Personal Portfolio Website which responsive and with eye catching animations

- Using HTML, CSS and JavaScript.

- Hosted on GitHub Page

EDUCATION:

Bannari Amman Institute of Technology | July 2019 – May 2023

BE Computer Science and Engineering   *CGPA: 8.47/10*
